GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

ITEM CONTINUATION

Although we have cattle on the ranch for five months a year, our ranch is primarily a wildlife habitat. The cattle help keep the grass down and prevent fire. We use very few chemicals, just a little on star thistle eradication. We plan a brushing program for the next few years to also lessen the fire hazard. Our plan is to continue to plant trees for the future generations.

Mrs Wallace (Sally McCready Wallace)

Conversation Description _____
Mrs Wallace called to say that they just ^{checked} got the mail at the Mariposa Ranch - they haven't
been there for a couple months. She said there were 2 certified mail slips from our Division
(the mail went unclaimed because they weren't there) and she was worried that they weren't
doing something they should be doing with regard to the above water rights. I checked the
various filings and couldn't figure out what the mail in question might have been, except that
it might have had something to do with the Delta hearings, but she said she got that (those?) notice.
Mrs Wallace said she wrote to us on this matter approx July 27, 1987 and I couldn't
locate this letter either. She asked that we change the address on the above filings to
